

# Fairey Surveys

Today, satellite imagery is providing valuable information to those working in agriculture, forestry, hydrology, engineering, mineral exploration and land use management

— in short to anyone needing information about the resources of the earth.

Fairey Surveys offers as a service, the ACQUISITION, PROCESSING, and INTERPRETATION of LANDSAT imagery. This information note explains how you can use this service.

## LANDSAT PRODUCTS SERVICE

### IMAGE ACQUISITION

If the imagery is available in Fairey Survey's existing library of LANDSAT data, a few days is all it takes to supply prints, transparencies and enlargements. If a particular frame, date of image or spectral band requested is not held in our library, Fairey Surveys will obtain the imagery in the shortest possible time due to:-

- direct TELEX links with Data Centres
- standing money order arrangements
- regular contacts with Data Centre personnel.

### IMAGE PRODUCTS

All standard image products are obtainable through:-  
Fairey Survey's LANDSAT PRODUCTS SERVICE.

The Company's long experience in all aspects of film processing, together with its modern laboratory facilities, ensures best possible results to meet the users specific needs.

## OTHER LANDSAT IMAGERY SERVICES

- **MOSAICING** — LANDSAT image mosaics, can be very useful as map replacements in countries with inadequate traditional maps or as an up-to-date base map for regional planning and development projects.
- **INTERPRETATION/ANALYSIS** — The Environment and Resources section of Fairey Surveys specializes in the interpretation and analysis of LANDSAT data in the fields of natural resources surveys, rangeland studies, rural land use mapping, water resources investigations and geomorphology.
- **IMAGE ENHANCEMENT** — Fairey Surveys have developed their own multispectral additive colour viewer for organisations wishing to carry out their own detailed visual analysis of LANDSAT imagery.
- **TRAINING** — Fairey Surveys staff can arrange specific training programmes on many aspects of LANDSAT image processing and analysis either at its headquarters in Maidenhead or in the client's own premises.

The products are provided at the same costs as those pertaining at the main Data Processing Centres plus a small service charge.
